

2022 BI INCORPORATED TECHNOLOGY & TRAINING FORUM

SEPTEMBER 29 & 30, 2022

EMBASSY SUITES • 13700 CONFERENCE CENTER DRIVE S • NOBLESVILLE, INDIANA

SESSION DESCRIPTIONS

Opening Session: BI Commitment to Quality & Excellence

We are excited to share what we're currently working on to enhance and improve your day-to-day experience with our technology and services.

General Session: Future BI Innovation

Learn about new BI products and key features releasing in the next 12 to 18 months.

Make BI TotalAccess® Work for You

Many new features have been introduced to date in 2022. This session provides an overview of new features, including new reports and how to evaluate GPS location data without manually reviewing individual points over several days.

Enhance Your Mapping Experience

Officers make critical supervision decisions every day. Available in TotalAccess, GPS mapping enables officers to quickly and efficiently gather monitoring data to identify client patterns and pinpoint risky behavior. Attend this session to learn about the many available mapping features and how to use them.

Mobile Monitoring

Learn how to incorporate mobile monitoring for improved community supervision. During this hands-on session, navigate through our officer and client smartphone apps, as well as preview new workflows and solutions that are currently in development. Bring Your Own Device (BYOD).

BI HomeGuard® 20|20: Hardware Training

HomeGuard 20|20 is the latest innovation in our long history of reliable radio frequency monitoring systems. This session offers a review of contemporary features for enhanced durability and reliability, best practices for effective curfew monitoring, and includes installation and removal training.

BI LOC8® XT: Hardware Training

LOC8 XT offers advanced multi-location technology and tamper detection features to enhance compliance. This session focuses on LOC8 XT device functionality, best practices for system setup, and the opportunity for hands-on experience installing and removing the device.

Beyond the Obvious: Games Criminals Play

BI has learned a great deal from our government partners and the countless attempts clients make to defeat electronic monitoring equipment and systems. This session highlights what to watch for and how to stay one step ahead of the individuals you monitor.

Inventory Best Practices

Learn more about the process and helpful tips for ordering and returning BI inventory.

Monitoring Center Tour

Visit the BI Monitoring Operations Anderson call center to learn how our staff support you each and every day.

Ask an Expert

Sign up to talk with a BI technology expert—ask questions about equipment or services your program uses, practice installing and removing devices, or get hands-on practice using new TotalAccess features.
