

BI SmartLINK®

THE POWER OF MOBILE APP MONITORING

Increase positive outcomes by placing the tools individuals need to be successful and accountable in the palm of their hands. BI is proud to be at the forefront of adjusting the way electronic monitoring services are provided. Mobile communication through BI SmartLINK® is immediate, convenient, and time-saving for both officers and clients.

ENHANCE COMMUNICATION, INCREASE ACCOUNTABILITY

Agencies use SmartLINK to simplify communication with clients and provide them with access to valuable information so they feel prepared and motivated to comply with their conditions of release. Communication tools include secure text messaging, video conferencing, access to community resources and their calendar, and push notification reminders.

LEAST RESTRICTIVE FORM OF SUPERVISION TECHNOLOGY

The SmartLINK monitoring app offers agencies a reliable supervision technology without the need for a body worn device. Clients can easily complete check-ins using biometric facial comparison technology and answer self-report questions. Plus, agencies can enable continuous location tracking with our secure device, BI Mobile®.

REDUCE TIME SPENT ON ADMINISTRATIVE WORK

Agencies and courts save time with SmartLINK as administrative functions are streamlined and automated. Giving clients the ability to submit information and schedules electronically through the app reduces the amount of paperwork officers need to handle.

CONNECTING OFFICERS & CLIENTS FOR INCREASED COMPLIANCE

BI Mobile is a secure device developed specifically for community corrections to alleviate challenges agencies and clients may face related to access to a phone. BI Mobile uses Mobile Device Management (MDM) software to control and secure the device. Pre-installed with SmartLINK, BI Mobile offers continuous location tracking and two-way VoIP calling.

INTUITIVE MONITORING SOFTWARE

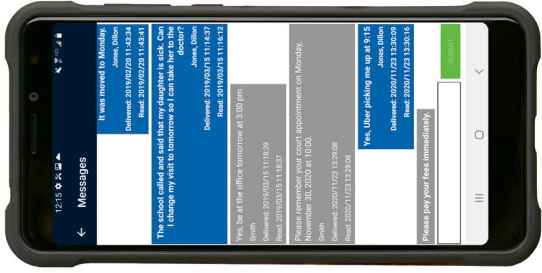

Officers manage their SmartLINK caseload through BI TotalAccess®, a secure, web-based software that provides agencies with quality case management tools 24/7.

KEY FEATURES

- Easy-to-use app that is downloaded on a client's smartphone or BI-provided device
- Tiered program options—select based on client risk and needs
- Calendar, helpful reminders, and the ability for clients to submit required paperwork can increase hearing attendance making officer follow up easy
- Records confirmation of client activities and location compliance
- Weekly training webinars available for officers
