The Power of App Monitoring

Increase positive outcomes by placing the tools individuals need to be successful and accountable in the palm of their hands. BI is proud to be at the forefront of evolving the way electronic monitoring services are provided. Mobile communication is immediate, convenient, and time-saving for both officers and clients.

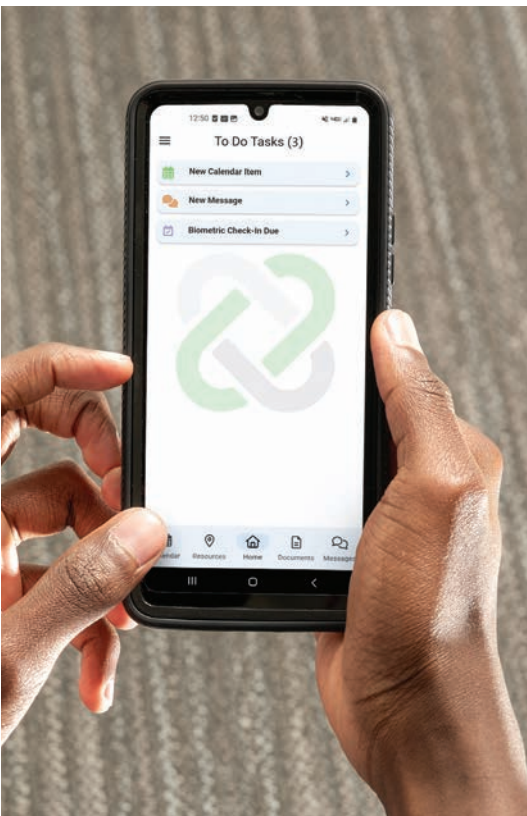

BI SmartLINK® provides a secure platform for real-time communication between officers and clients. This affordable and easy-to-use app enables agencies to securely monitor, collect data, automate administrative work, and enhance compliance and accountability.

BI SmartLINK

Key Features

- Tiered program options—based on client risk/needs
- App is downloaded on client's smartphone or BI-provided device
- Least restrictive form of supervision technology
- Secure messaging, video conferencing, and notifications help clients stay accountable
- Least restrictive form of supervision technology
- Liveness detection provides an automated, nonintrusive approach to verify a live person at check-in
- Calendar, helpful reminders, and the ability for clients to submit required paperwork helps increase communication, compliance, and positive outcomes
- Direct access to local resources
- Use with a BI GPS, alcohol, or RF device for enhanced communication

Developed for community corrections, BI Mobile® alleviates challenges agencies and clients may face related to access to a phone. BI Mobile uses Mobile Device Management (MDM) software to provide top level security to protect against hacks and virus attacks.

BI Mobile

Key Features

- Pre-installed with SmartLINK, plus location monitoring of the device and VoIP calling
- Ability to control device activity
- Eliminates risk of GPS spoofing
- Hassle-free setup
- 24/7 customer and technical support

Specs

- 6.3" H x 3.0" W x 0.3" D
- 6.5" color, LCD touch screen
- Weight (with battery): 6.8 oz.
- Up to 100 hours battery life on a single charge
- Approximately 200 hours of standby battery life
- Bluetooth and Wi-Fi capable

Our Story

For more than 45 years, BI Incorporated has delivered innovative electronic monitoring technologies and case management services, offering a reliable, safe, and cost-effective way to monitor individuals as they live and work in the community.

The BI Difference

Our continuum is backed by experienced customer support and training teams—unparalleled in the industry—and easy-to-use software that makes using our solutions a productive experience.

Made in the USA

BI proudly designs, engineers, and manufactures 200,000+ electronic monitoring units annually in Colorado. We employ more than 1,000 professionals and our supply chain includes thousands of additional U.S. workers.

Our Solutions

BI has a long history of staying ahead of technological trends to meet evolving supervision needs. Areas of expertise include:

- Community supervision
- Prison and jail overcrowding
- Bail Reform and pretrial monitoring
- Family law
- Progressive technology
- Future-ready products

Real-time Monitoring

GPS tracking offers agencies actionable data and visualization abilities via Google Maps®. This technology enables individuals to work and live in the community while being monitored closely for curfews, movement, and more.

BI VeriWatch®

Key Features

- Verifies location and identity
- Biometric authentication, liveness detection, and proximity sensor
- Custom operating system to control device activity
- Ability to send notifications and messages
- Convenient on-the-go charging
- Real-time calendar for enhanced compliance

Wrist-worn Specs

- 2.25" H x 1.5" W x 0.75" D
- Weight: 2.3 oz.
- GPS and Wi-Fi location tracking
- High frequency pursuit mode
- Up to 16 hours battery life on a single charge; up to 24 hours when paired with transfer battery

BI LOC8® XT

Key Features

- Complete community coverage with GPS, Wi-Fi, and cellular location technology
- Low-profile, curved ankle bracelet design
- Robust tamper detection
- Use of multiple satellite constellations improves accuracy of location data
- Google Maps to build zones and track client movement
- Power-saving beacon option

Bracelet Specs

- 2.5" H x 4.2" W x 1.6" D
- Weight: 6.1 oz.
- Secure, non-removable battery
- Over-the-air firmware updates
- Up to 60 hours battery life on a single charge
- Cordless charging in under two hours

Enhanced Reliability & Communication

Radio frequency solutions are ideal for monitoring client compliance to curfews and other defined locations. BI HomeGuard® has been the gold standard for radio frequency electronic monitoring for more than 20 years. BI HomeGuard 20|20, offers enhanced technology and features to improve both agency and client experience.

BI HomeGuard 20|20

Key Features

- Compact design
- Dual antennas for reliable connection
- Advanced tamper and motion detection
- Base station touch screen enhances officer/client communication
- Enhanced security with GPS in base station

Bracelet Specs

- 2.1" H x 2.9" W x 1.0" D
- Weight: 2.0 oz.
- Minimum two years battery life

Base Station Specs

- 3.0" H x 6.5" W x 7.5" D
- Weight: 1.26 lbs.
- 3.5" color, LCD touch screen
- 48-hour backup battery
- Stackable design improves agency inventory capacity

Drive Sobriety

Alcohol monitoring supports an individual's sobriety while undergoing community-based treatment. Courts and agencies also need effective compliance and curfew monitoring solutions for individuals with DUI or high-risk alcohol use histories. The BI breath alcohol and transdermal detection devices accurately test and drive client sobriety, and results are court admissible in drug courts, divorce courts, and custody cases.

BI SL3®

Key Features

- Pocket-sized portability
- Biometric facial comparison technology
- Court admissible
- Cellular and GPS technology
- Near real-time BrAC results
- Scheduled and random testing keep clients on notice for sobriety

Specs

- 5.0" H x 2.9" W x 1.4" D
- Weight: 8.7 oz.
- Silicone case for durability and protection
- Up to 72 hours battery life
- Lithium-ion rechargeable battery
- Sensor accuracy within .005 BrAC

BI TAD®

Key Features

- Court admissible
- 24/7 transdermal alcohol detection
- No client or back up testing needed
- Built-in radio frequency monitoring
- Base station touch screen enhances officer/client communication

Bracelet Specs

- 3.4" H x 2.7" W x 2.0" D
- Weight: 8 oz.
- Six months between calibrations
- Water-resistant

Base Station Specs

- 3.0" H x 6.5" W x 7.5" D
- Weight: 1.26 lbs.
- 3.5" color, LCD touch screen
- 48-hour backup battery
- Stackable design improves agency inventory capacity

LTE Technology

BI Stays Ahead of the Game

Long-Term Evolution (LTE) has changed the way the world connects—devices are faster, big data is more accessible, and service seems boundless. Technology is not slowing down, and neither are the BI engineers. BI continues to lead the community corrections field by diligently integrating LTE into its present and future products.

Key Benefits

- Higher bandwidth/data speed compared to 3G
- Low latency/lower idle-to-active times
- High spectrum efficiency provides a higher network capacity and improves cost efficiency
- Backwards compatibility/future-proofing increases flexibility and lifespan
- An all-IP network allows for easier integration and cost efficiency

When choosing an EM provider, agencies need cost-effective solutions that meet their current and future needs, and BI considers these needs on a daily basis. "One of our core research missions is to continually evaluate each new generation of wireless technology and understand how it can improve the products and services BI offers. As a result, we've engineered LOC8 XT and HomeGuard 20|20 to operate on both 4G and 5G networks, providing our public sector partners with the longevity on which they depend."

– Joe Newell, Product Innovation

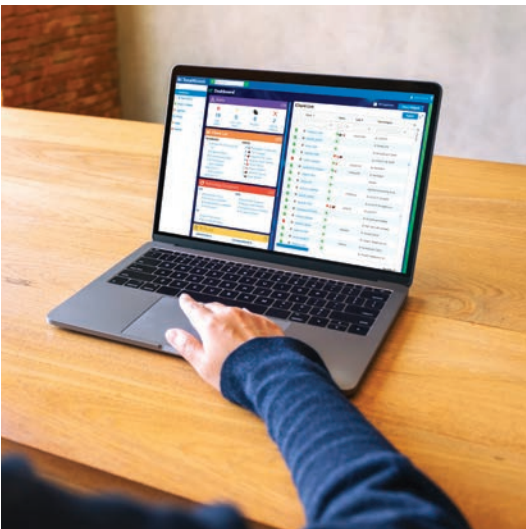

Manage Your Caseload Anytime, Anywhere

Through actionable data, officers can effectively manage larger caseloads and more challenging clients. BI monitoring software is designed to make your job easier—quick caseload access and efficient management of clients, alerts, schedules, and more.

BI TotalAccess®

Key Features

- Advanced mapping through Google Maps to build custom zones and track client movement
- A fully functional officer mobile app for case management on the go
- Robust reports for client activity, caseload stats, and inventory status
- Applied analytics to better understand client behavior and calculate potential risk
- Integration tools to eliminate data gaps
- Professional training offered weekly

A True Staff Multiplier

With growing caseloads, centralized data and streamlined case management are vital to keeping communities safe and officers efficient. Designed to increase agency coverage, the BI Agency Assist® services can relieve officers of up to 50% of their time spent on administrative tasks.

BI Agency Assist

Key Services

- 24/7 live support
- Contact documentation—a paperless data entry solution for officers to dictate and record notes while in the field
- Scheduling—live specialists take client calls to verify, schedule, or amend appointments
- Enhanced monitoring—support specialists handle alerts and escalation to reduce officer alert flow
- Client docs—upload, store, and access client records in one system to reduce paperwork and streamline record keeping
- Automated services—using Interactive Voice Response (IVR) technology, clients can check-in, call in a leave or return, make contact updates, receive date reminders, and more

Outstanding Support & Training

Our U.S.-based call centers help agencies of all sizes expand their impact on community safety and ensure that individuals meet the conditions of their release. BI provides agencies with an array of monitoring services, and our staff collaborate daily with supervising officers, manage client questions, generate insightful reports, provide continuous training, and more. Our monitoring specialists undergo rigorous training and certification for all systems and procedures to manage alerts and calls for our public sector partners.

BI Monitoring Operations

Key Services

- 24/7 live support
- Alert triage to reduce officer workload
- Rapid response for officer questions
- Bilingual services
- Single platform data management software
- Expert training delivered through online classes, webinars, and on-site training

Proven Alternatives to Detention

BI technologies enable courts and correctional agencies to release individuals to community supervision where they can live their lives, support themselves and their families, and contribute to the community. In turn, with the support of these innovative tools, supervising officers better understand how a person is doing in the community, while ensuring conditions of release are met.
