

BI SmartLINK

THE POWER OF MOBILE APP MONITORING

Increase positive outcomes by placing the tools individuals need to be successful and accountable in the palm of their hands. BI is proud to be at the forefront of evolving the way electronic monitoring services are provided. Mobile communication through BI SmartLINK® is immediate, convenient, and time-saving for both officers and clients.

ENHANCE COMMUNICATION, INCREASE ACCOUNTABILITY

Agencies use SmartLINK to simplify communication with clients and provide them with access to valuable information so they feel prepared and motivated to comply with their conditions of release. Communication tools include secure text messaging with single-button translate, video conferencing, access to community resources and their calendar, and notification reminders. Plus, the enhanced home screen is designed to increase accountability by prioritizing tasks for the client.

LEAST RESTRICTIVE FORM OF SUPERVISION TECHNOLOGY

The SmartLINK monitoring app offers agencies a reliable supervision technology without the need for a body-worn device. Clients can easily answer self-report questions and complete check-ins. The app biometrically authenticates the identity of the client by comparing a new photo against photos established at enrollment. Liveness detection technology adds the ability to verify that a live person is completing the check-in.

REDUCE TIME SPENT ON ADMINISTRATIVE WORK

Agencies and courts save time with SmartLINK as administrative functions are streamlined and automated. Giving clients the ability to submit information and schedules electronically through the app reduces the amount of paperwork officers need to handle.

CONNECTING OFFICERS & CLIENTS FOR INCREASED COMPLIANCE

BI Mobile® is a secure device developed for community corrections to alleviate challenges agencies and clients may face related to access to a phone. BI Mobile uses Mobile Device Management (MDM) software to control and secure the device. Pre-installed with SmartLINK, BI Mobile offers location monitoring capabilities and two-way VoIP calling.

INTUITIVE MONITORING SOFTWARE

Officers manage their SmartLINK caseload through BI TotalAccess®, a secure, web-based software that provides agencies with quality case management tools 24/7.

KEY FEATURES

- Easy-to-use app downloaded on a client's smartphone or BI-provided device
- Tiered program options—select based on client risk and needs
- Home screen features a to-do list, enabling clients to view all tasks in one place and complete requirements
- Calendar, helpful reminders, and the ability for clients to submit required paperwork helps increase communication, compliance, and positive outcomes
- Enhanced client enrollment process ensures quick app activation
- Liveness detection provides an automated, nonintrusive approach to verify a live person at check-in
- Records confirmation of client activities and location compliance
- iOS and Android compatible
- Available in English, Spanish, Portuguese, and Haitian Creole
- Monthly training webinars available for officers
