

2025 BI INCORPORATED

TECHNOLOGY & TRAINING FORUM

SESSION DESCRIPTIONS

Attendees may customize their experience by choosing from general, beginner, and advanced sessions.

GENERAL SESSIONS

These sessions are informative for all officers, regardless of their experience with BI technology and previous Tech Forum attendance.

Next Generation BI Technology

Join us for a look into the future. In this session, preview the future-ready products, scheduled to release within the next 18 months.

BI Innovation Labs: Commitment to Research & Development

In this session, discover which emerging technologies the BI Innovation Labs team is researching for future development.

Wrist-worn Location Tracking

This session provides an overview of our latest secure, discreet, and cost-effective wrist-worn devices.

Installation & Removal Hands-on Practice

During this session, practice installation and removal techniques. Ask questions and provide feedback with BI experts by your side.

Designing for You: Hands-on User Experience Workshop

Join us to discover how BI builds tools with diverse users in mind, share your unique experiences, and design your ideal BI TotalAccess® dashboard. This session offers engaging activities and an opportunity to collaborate, provide valuable feedback, and gain insight into how user-centered design shapes the tools you use every day.

Inventory Management Best Practices

This session focuses on best practices for ordering BI equipment and tracking and returning inventory.

BEGINNER SESSIONS

These introductory sessions are geared towards officers who are new to using BI technology and services and do not include hands-on training.

BI TotalAccess Best Practices

In this session, learn how to optimize key features within the web-based platform and mobile app to maximize your time and enhance your user experience.

BI SmartLINK® Best Practices

This session teaches effective ways to monitor clients through the mobile app and focuses on key functionality and features available to you and your clients.

BI VeriWatch® Best Practices

Location tracking, biometric facial comparison technology, and communication tools—all in a discreet wrist-worn device. This session focuses on device functionality and best practices to make the most of the built-in features.

BI LOC8® XT Best Practices

This session focuses on device functionality and best practices for system setup. This session also includes an overview of BI Notifi®, a mobile app for at-risk individuals seeking enhanced personal safety.

BI HomeGuard® 20|20 Best Practices

This session includes a review of device functionality and best practices for effective curfew monitoring.

Alcohol Detection Best Practices

In this session, learn about BI TAD® and BI SL3® device functionality and best practices for using these court-admissible solutions.

ADVANCED SESSIONS

These sessions are geared toward officers who are experienced with BI technology and services and have attended at least one Tech Forum.

BI LOC8 XT Expert Level Troubleshooting

In this advanced session, discuss how to troubleshoot challenging situations and the ways clients may try to defeat LOC8 XT to help keep you one step ahead.

BI HomeGuard 20|20 Expert Level Troubleshooting

In this advanced session, discuss how to troubleshoot different scenarios and the ways clients may try to defeat HomeGuard 20|20.

Alcohol Detection Expert Level Troubleshooting

In this advanced session, discuss how to troubleshoot challenging situations with clients on BI SL3® or BI TAD® and how clients may try to defeat the devices.

Advanced BI TotalAccess Mapping & Reporting

This advanced session dives into BI TotalAccess mapping capabilities and provides an overview of the vast reporting solutions available.
